

Public Works Operations Manager

THE IDEAL CANDIDATE

The ideal candidate will be an experienced engineer and project manager, well versed in modern principles and practices of engineering and program and project management, with effective verbal and written communication who possess broad experience in public works. The successful candidate will have effective interpersonal skills to interact with staff professionally and positively, a proven work history of growth, the ability to effectively implement projects, and possess a passion for public service and who would like to make a true difference in a community by actively transforming and optimizing processes and seeking creative solutions to overcome challenges. This position is ideal opportunities for individuals that are seeking creative solutions to overcome challenges.

Key skills and characteristics

- ▶ Demonstrated skills and experience with planning, design, and project management, and implementation of large and smaller community public works projects
- ▶ Ability to develop engineering schedules, prepare budgets and cost estimates, manage, and monitor contracts. A skill set on Primavera or similar project management software is ideal
- ▶ A skill set to train, mentor, and evaluate personnel
- ▶ Able to provide expertise in municipal engineering, particularly related to capital improvement projects and municipal operation activities
- ▶ Approachable. Seeks open communication, collaboration, and a desire to work in a team-oriented environment
- ▶ Flexible. Able to meet clear goals and expectations, while remaining agile with the ability to adapt to changing priorities

- ▶ A 'roll up their sleeves' type of person who understands the importance and value of providing high performance and excellent services to a community

QUALIFICATIONS

- ▶ Graduation from an accredited four-year college or university with a bachelor's degree in civil engineering, construction management, project management, architectural engineering, geotechnical engineering, or a related engineering field
- ▶ Ten (10) years of progressively responsible experience in engineering, construction, and project management
- ▶ Five (5) years in management or supervision, or an equivalent combination of education, training, and experience
- ▶ Experience in civil design/construction, street construction and traffic signalization is particularly relevant
- ▶ Applicants must possess a valid Professional Engineering license (PE) in the State of California.
- ▶ A Certified Construction Manager certification from the Construction Management Association of America (CMAA) or a Project management Professional (PMP) certification is highly desirable
